DETAILED ACTION

Claim Objections

Claim 17 objected to because of the following informalities: with respect to line 5, it appears that ---the--- should be inserted before “position”. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 13 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 13, lines 4-5, it is unclear as to what is meant by “one an actuating member...”. It appears that the recitation of “one an” should be deleted.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent no. 6,561,489 to Wakefield.

With respect to claims 1-14, Wakefield discloses an automatic winch drive system adapted to mount a motorized conveyance and designed specifically to raise and lower a spare tire and wheel. Wakefield discloses, among other things, a carrier, a winch, a monitoring device adjacent the winch and a control module.

With respect to the method claims 15-20, the method recited in these claims would inherently result from the use of the automatic winch drive system of Wakefield as advanced above.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
